

KEYWORD INDEX 2011

- (–)-epigallocatechin-3-gallate160–166
 6-sulfatoxymelatonin.....229–236
 acid, lactic21–32
 acids
 free fatty.....177–181
 organic33–40
 acrylamide elimination.....133–138
 activity
 antibacterial.....21–32
 antioxidant.....199–209
 enzyme.....254–264
 analysis
 multivariate.....41–49, 199–209
 risk.....254–264
 antagonism.....139–149
 anthocyanin.....229–236
 antioxidant.....33–40, 57–67, 229–236
 approximation, single-step.....133–138
Arbutus unedo73–85
 bacteria, lactic acid.....125–132, 193–198
 banana.....1–12
 benzo[*a*]pyrene.....249–253
 biofilm.....13–20
 biphenyls, polychlorinated.....106–117
 biscuits.....182–190
 bones, tuna head.....150–159
 cactus, prickly pear.....221–228
 caffeine.....160–166
 capacity, water holding.....150–159
 catechins.....160–166
 cells
 Caco-2.....139–149
 intestinal.....237–248
 centrifugation.....86–105
 citrus by-products.....182–190
 composition, chemical.....73–85
 compounds
 flavour.....50–56
 total polar.....177–181
 content, mineral.....41–49
 cowpea, Mexican.....210–220
 CP4 EPSPS (5-enolpyruvylshikimate-3-phosphate
 synthase), truncated.....254–264
Cronobacter spp., pathogenic.....118–124
 cultures, mixed.....139–149
 defense, antioxidant.....237–248
 detection.....118–124
 dioxins.....106–117
 efficiency, separation.....86–105
 electrophoresis, capillary.....33–40
 emulsification.....150–159
 enterocin genes.....21–32
Enterococcus sp.....21–32
Escherichia coli, enteropathogenic.....139–149
 evaluation, sensory.....182–190
 exopolysaccharide.....50–56
 extraction.....160–166
 extraction, multi-step.....57–67
 fat-binding.....150–159
 fermentation.....221–228
 fibre, dietary.....1–12, 182–190
 filtration.....86–105
 foaming.....150–159
 food
 powdered milk.....118–124
 starchy.....1–12
 gelatin.....150–159
 halal bovine.....150–159
 gene transfer, horizontal.....254–264
 glyceryl trioctanoate.....249–253
 heating.....249–253
 honey.....33–40
 HPLC.....160–166, 199–209, 249–253
 hydrocarbons, polycyclic aromatic.....249–253
 cheese, bryndza.....21–32
 index, glycaemic.....1–12
 infant milk formula.....106–117
 intake, daily.....106–117
 isolate, protein.....210–220
 isomalto-oligosaccharides.....125–132
 kimchi.....221–228
 kinetics
 non-Arrhenian.....133–138
 non-isothermal.....249–253
Lactobacillus paracasei subsp. *paracasei*.....139–149
 legumes.....1–12
 maize.....1–12
 medicine, folk.....73–85
 mechanics, particle.....86–105
 microbiology, predictive.....193–198
 milk, breast.....106–117
 milk, fermented.....125–132
 modelling.....133–138
 mushroom, white.....167–176
 nutraceuticals.....57–67
Opuntia ficus-indica var. *saboten*.....221–228
 package, modified atmospheres.....167–176
 parameters, physical.....182–190
 PCR, real-time.....118–124
 photooxidation.....249–253
 plum.....229–236
 polyphenols.....199–209
 prebiotics.....125–132
 pressure, high argon.....167–176
 probiotics.....139–149
 products, Maillard reaction.....237–248
 properties
 biological.....73–85
 farinographic.....182–190
 functional.....210–220
 nutritional.....210–220
 suspension.....86–105
 technological.....50–56
Prunus salicina.....229–236

- Pseudomonas* spp. 13–20
 quality 221–228
 frying oil 177–181
 rapid tests
 3M LRSM 177–181
 Testo 265 177–181
Rubus fruticosus 199–209
 saccharides 33–40
 safety, food 254–264
Salmonella Typhimurium 139–149
 sanitizer 13–20
 separation
 hydrocyclone 86–105
 membrane 86–105
 serotonin 229–236
 services, food 177–181
 shelf life 167–176
 Spain 41–49
 stability, thermooxidative 133–138
Staphylococcus spp. 13–20
Staphylococcus aureus 193–198
 starch, resistant 1–12
 stones, olive 57–67
 storage 167–176
 strength, gel 150–159
Streptococcus thermophilus 50–56
 stress, oxidative 237–248
 tea, green 160–166
Vigna unguiculata 210–220
 wine
 blackberry 199–209
 red 41–49
 yoghurt 50–56
 probiotic 125–132
